PROFESSIONAL SUMMARY

Software Engineer with 3+ years of experience in enterprise application development, remote collaboration, and end-to-end system ownership.

Strong background in enterprise software development using OutSystems Reactive and Traditional Web technologies, including authentication systems, reusable modules, deployment management, production troubleshooting, and enterprise workflow implementation.

Experienced in translating business ideas into scalable technical solutions, including workflow design, role-based access control (RBAC), authentication flow, database structure, API architecture, and frontend/backend implementation.

Currently transitioning into modern AI-assisted full-stack engineering using Next.js, React, TypeScript, React Native, NestJS, PostgreSQL, Prisma, and Supabase while leveraging AI-assisted development workflows to accelerate prototyping, architecture planning, debugging, and technical documentation.

TECHNICAL SKILLS

Frontend	TypeScript, JavaScript, React.js, Next.js, React Native, Tailwind CSS
Backend & Database	NestJS, REST API Development, PostgreSQL, Prisma ORM, Supabase, Authentication & Session Management
Enterprise & Low-Code	OutSystems O11 (Reactive & Traditional Web), UiPath Automation Development & Testing, Enterprise Application Support & Deployment
Architecture & Eng.	System Design, RBAC, Database Design, SaaS Architecture, Technical Documentation, AI-Assisted Development Workflow
Tools & Platforms	Git, Jira, Adobe Photoshop & Illustrator, Basic Android Development (Java/Kotlin), SketchUp

WORK EXPERIENCE

Construct-X Indonesia	Nov 2025 – Present
Software Engineer (End-to-End Development & Technical Ownership)	
- Led end-to-end application development including frontend, backend, authentication, and database architecture. - Translated high-level business concepts into technical implementation without dedicated Business Analyst involvement. - Designed scalable application workflows, role management, and business logic architecture. - Built backend services using NestJS, REST APIs, and PostgreSQL-based architecture. - Implemented frontend and mobile features using Next.js and React Native. - Leveraged AI-assisted workflows to accelerate development, debugging, architecture planning, and technical documentation.	

- Led automation initiatives using UiPath while coordinating a small development/testing team.
- Contributed independently in fast-paced remote development environments with rapid iteration cycles.

Wilmar Consultancy Services (WCS)

Aug 2022 – Oct 2025

Enterprise OutSystems Developer

- Maintained and supported 8 enterprise applications used globally across Singapore, Indonesia, Malaysia, Europe, Africa, and USA.
- Designed and developed enterprise-grade solutions using OutSystems Reactive and Traditional Web technologies.
- Managed non-production deployments ensuring stable and reliable release cycles.
- Designed and developed reusable OTP module for multi-application usage compatible with both Traditional Web and Reactive Web applications.
- Conducted research and developed working prototype for Single Sign-On (SSO) implementation, delivering proof-of-concept enterprise authentication solutions.
- Translated business requirements into technical design including workflow, database structure, and system logic.
- Troubleshoot and resolved production issues with fast turnaround and led migration of large-scale production application between environments with zero downtime.

Construct-X

Jul 2019 – Aug 2022

3D Model Data Processing (VCM Staff)

- Processed and analyzed 3D model data.
- Conducted software testing and validation.
- Created internal documentation and job aids to assist data preparation and system support.

CV. Dwi Tunggal

Nov 2015 – Nov 2016

Administration Staff

- Managed contracts and company documentation.
- Assisted procurement and client communication, conducting site surveys and material analysis.

PROJECTS

Personal Finance App (Ongoing)

- Building a subscription-based personal finance platform using Next.js, TypeScript, Prisma, and Supabase.
- Designed scalable multi-user financial organization structure and transaction tracking system.
- Implemented authentication, API routes, and PostgreSQL database integration, planning React Native mobile integration for Android.
- Currently exploring AI-generated financial insights and monthly reporting features.
- Applying modern full-stack architecture and scalable frontend/backend patterns.

Inspire Robotics Challenges Platform

- Designed and implemented end-to-end challenge and investment management platform architecture.
- Defined authentication flow, RBAC structure, transaction lifecycle, and challenge cycle logic.
- Built frontend application using Next.js and TypeScript with scalable modular architecture and relational database structure.
- Leveraged AI-assisted workflows for rapid architecture planning, technical documentation, and system prototyping.
- Delivered core frontend and business flow implementation within a rapid development timeline.

Workshop Management App (Planned)

- Designing business management system for automotive workshop operations based on real business operational requirements and scalable SaaS concepts.
- Planned features include transaction tracking, customer management, reporting, and operational monitoring.

EDUCATION & CERTIFICATIONS

Universitas Pembangunan Panca Budi Medan
Computer Science, Sains & Technology | GPA: 3.81 /
4.00

2016 – 2021

Certifications OutSystems Associate Reactive Developer O11 (2024)

Junior Graphic Designer Certification – BNSP (2020)

Dicoding Academy – Memulai Pemrograman Dengan Java (2021)

Languages Indonesian (Native), English (Professional Working Proficiency)
